Ezekiel Adebayo OGUNDEPO

Data Scientist · Statistician · Researcher · Geospatial Analyst · Project Manager

Email: ogundepoezekiel@gmail.com **Tel**: +2347068800646

Adaptable data scientist with 10 years of experience in analyzing and interpreting data in a fast-paced environment. He has successfully applied himself across the fields of statistics, mathematics, computer science, and geo spatial. He enjoys wrangling data, building tools, and automating processes. He is good at building relationships across different levels and with people from all social or cultural backgrounds.

Work Experience

April 2025 Present **Lead Statistician (Consultant), Redwire Marketing Group, Lagos, Nigeria** (https://redwire-group.com)

Multidimensional Poverty Research Project (19 Northern Nigeria states)

***Tasks** perform:*

- Design the project's statistical framework and overall methodology
- Lead geospatial QA/QC and supervise field data collection across 19 northern states.
- Execute complex spatial operations, including buffer and hotspot analyses, to produce high-quality maps and insights that guide programme targeting, monitoring, and evidence-based decision making.
- Manage comprehensive GIS metadata repositories and map version histories to provide critical geospatial summaries for donor reports and operational stakeholder engagement.
- Perform advanced statistical analyses and translate results into clear, actionable insights
- Co-author research reports and policy recommendations for government and development partners
- Provide technical leadership and mentor a multidisciplinary team, ensuring methodological rigour and timely delivery

October 2023 April 2024 **Fellow, Global Partnership for Sustainable Development Data** (https://www.data4sdgs.org)

***Tasks** performed*

- Conducted baseline research and integrated relevant environmental, climate, cholera, and socio-economic data for cholera outbreak analysis.
- Built and evaluated predictive models using advanced geospatial machine learning algorithms to forecast cholera outbreaks.

- Created and maintained a comprehensive GitHub repository with well-documented code and data sources.
- Predicted cholera incidence across raster cells and presented the project results through a detailed report and slide presentation.
- Developed and delivered training modules in advanced data analysis techniques and version control to enhance team capabilities.

Nov. 2021 **Senior Data Analytics Manager, 54gene**
July 2023 **(**https://54gene.com)

***Tasks** performed*

- Developed and implemented advanced data management procedures.
- Oversaw data quality control across multiple sites, ensuring data integrity.
- Monitored data systems to optimize analysis outcomes.
- Ensured data accuracy and adherence to protocols in collaboration with site teams.
- Automated health data analytics, reducing manual dependency by 80% using Google Sheets, App Script, and R.
- Developed the 'bulkreadr' and 'forstringr' R programming packages, designed to enhance efficiency in data reading and manipulation processes.
- Documented statistical methods and programming scripts.
- Conducted training on data operational activities for team enhancement.

Nov. 2019 **Data Scientist, Data Scientists Network (DSN)**
Nov. 2021 **(**www.datasciencenigeria.org)

***Tasks** performed*

Bill and Melinda Gates Foundation (BMGF) Project:

- Developed and applied advanced statistical models to analyze data across Health, Education, and Economic Affairs sectors to inform policy and decision-making processes.
- Supervised and coordinated a team of data scientists, ensuring the successful completion of the project.
- Worked with the project manager to develop quarterly and annual reports for BMGF.

Data Science Nigeria Activities:

- Led end-to-end data analytics project for various clients
- Kept abreast of developments in data visualization and advanced analytics/statistical modelling.
- Played a key role in organizing multiple hackathons, including AI for Energy and AI Commons, as part of the mission to develop one million AI talents in Nigeria within 10 years.
- Conducted corporate data science training for Health Strategy and Delivery Foundation staff, focusing on R programming, Advanced Microsoft Excel, and PowerBI.
- Supervised a team dedicated to building Africa's AI ecosystem, creating training content with over 640,000 views on YouTube.
- Contributed to organizing Africa's largest AI Bootcamp in 2019, 2020, and 2021, attracting over 10,000 participants from 30 countries.

May- November 2018 **Data Scientist at Planning and Research unit,**
Rwanda Revenue Authority (RRA), Rwanda (https://www.rra.gov.rw)

***Tasks** performed*

- Cleaned and analyzed a large volume of the Rwanda revenue data for fiscal policy
- Automated various statistical reports required by different stakeholders
- Built and managed tax revenue data portal for planning and research unit
- Improved the methods of data analysis in RRA
- Trained RRA staff in advanced Microsoft Excel and R programming
- Prepared RRA revenue statistics for publications.

September 2016 November 2019 **Freelance data analyst, Fiverr Corporation, USA**
www.fiverr.com/gbg_analyst

***Tasks** perform*

- Expertise in Statistical Consultancy and Data Analysis
- Globally Recognized with Services Rendered in the US, Canada, Germany, and Beyond (12% World Reach)
- Proficient in Web/Data Scraping Techniques
- Advanced Skills in Microsoft Excel: Power Query for Data Cleaning, Pivot Tables, and Charts for Analysis and Visualization
- Custom Dashboard Development Catering to Client-Specific Needs
- Proficient in Interpreting Data from Primary and Secondary Sources Using Statistical Methods
- Advanced Statistical Analysis Utilizing R and Python
- Provided Comprehensive Training on Various Analytical Tools

October 2015 **Research Intern,** Statistics Department
October 2016 Federal University of Technology, Minna, Niger State, Nigeria

***Tasks** performed*

- Assisted in delivering lectures on a variety of statistical courses, including Probability, Operations Research, Predictive Modeling, Bio-statistics, Econometrics, and Statistical Computing using R and Python.
- Actively collaborated with team members to ensure timely completion of projects, meeting critical deadlines.
- Spearheaded the collection, cleaning, and analysis of both structured and unstructured data within and outside the university environment.
- Provided expert data analysis and report generation support to PhD candidates and lecturers from various departments.
- Conducted pro bono tutoring for over 100 university students, focusing on data analysis using tools such as Excel, SPSS, and R.

Computer Skills

GIS tools: ArcGIS, QGIS, R (sf, terra) and Python (geopandas, georasters)

Programming: R and Shiny, Python, SQL, occasionally: JavaScript, HTML, CSS

Business Intelligence: Power BI, MS-Excel and Google Sheets, Lookers

Cloud Platform: AWS, Microsoft Azure, Big Query, SurveyCTO

Documentation: Quarto, LaTeX, git, Markdown, RMarkdown, Jupyter, sphinx, roxygen,

Education

Aug. 2017- Feb. 2019 **M.Sc. in Mathematical Sciences** AIMS
African Institute for Mathematical Sciences (AIMS), Rwanda

Oct. 2011- Aug. 2015 **B.Sc. in Statistics, First Class Honours**
University of Ilorin, Ilorin, Nigeria

Fellowship Programme

2024 **Data Science Fellow**, Global Partnership for Sustainable Development Data

The Capacity Accelerator Network (CAN) Data Science Fellowship, supported by data.org, GPSDD, JPAL, the Wellcome Trust, and GEO-LDN, focuses on leveraging data science for global challenges. I was a key member of the fellowship at eHealth Africa in Nigeria, where I worked on identifying environmental factors driving cholera outbreaks in Yobe State to enhance public health surveillance and response efforts.

2024 **Champion**, rOpenSci

The rOpenSci Champions Program, supported by the Chan Zuckerberg Initiative, aims to increase diversity in open source and research software communities. This 12-month program includes cohort-based training, one-on-one mentorship, project development, and outreach activities. As a Champion, I am contributing to building sustainable and inclusive research software by developing new packages, participating in peer reviews, and engaging in outreach initiatives such as presentations and blog posts to support underrepresented groups in the community.

2018 **UNLEASH Talent** at https://unleash.org

UNLEASH is a global innovation lab that brings together 1,000 carefully selected young talents from around the world to collaborate on ideas and solutions for the UN Sustainable Development Goals (SDGs). UNLEASH started in Denmark in 2017 and expanded to Singapore in 2018 and Shenzhen, China, in 2019.

Professional Programmes or Certifications

2025 Certificate of Completion in Generative AI in Data Analysis, Open Visualization Academy, openvisualizationacademy.org

2025 Certificate of Recognition as a Coordinator FAIR Data Steward organised by VODAN and Europe External Programme with Africa (EEPA) in the Africa Health Data Space.

2024 A Practical Guide to FAIR Data Stewardship, VODAN Africa. The course qualifies for 2 ECTS (European Credit Transfer System)

2024 Participated in the Llama 3.1 Impact Sub-Saharan Africa Hackathon in Kigali, Rwanda (October 8–10), organised by AfriLabs in partnership with Meta and the Bill & Melinda Gates Foundation.

2023 Participated as a CAN Fellow in the Festival de Datos, sponsored by the United Nations, held in Punta del Este, Uruguay. This notable event focused on advancing global data initiatives for sustainable development.

2023 Attended the 10th Heidelberg Laureate Forum (HLF) in Germany as a young researcher in September 2023.

2023 Attended the R Project Sprint 2023 and contributed to the maintenance of R programming at the University of Warwick, United Kingdom (UK).

2022 Participated in the UNESCO-ICTP Workshop on Collaborative Scientific Software Development and Management of Open-Source Scientific Packages in Trieste, Italy.

2022 Nigerian National Code for Health Research Ethics, CITI Program

Consultancy/Volunteer Experience

May- 2024 Present **Program Coordinator, Diploma in Data Science, Thomas Adewumi University, Kwara, Nigeria.**

As the Program Coordinator for the Diploma in Data Science at Thomas Adewumi University, I oversee the delivery and management of a comprehensive curriculum designed to equip final-year students with essential skills in data science, machine learning, business analytics, and digital entrepreneurship. My role includes coordinating courses such as Data Analysis using Excel, R, Python, and Power BI, along with advanced topics like Generative AI, LinkedIn Optimization, and Process Automation using the Power Platform. I also ensure that students gain hands-on experience, providing them with the tools and skills needed to excel in the dynamic data-driven job market. Additionally, I lead the development of training modules, collaborate with instructors, and maintain program resources to enhance the learning experience for all participants. website: *htt*ps://tauniversity.github.io/tau-ds-webpage.

July- July 2022 **Kobo toolbox developer, 6334 Group, Lagos, Nigeria**

Project Title- Developing an Electronic Data Collection Tool for Minimum Service Package Across all Primary Healthcare Centers in Lagos state, Nigeria.

***Tasks** perform*

- Developed questionnaire script using Microsoft Excel via Kobo toolbox
- Tested of tool designed
- Real-time data monitored
- Built capacity for the 6334 team on data collection kit's interface (Kobo collect)
- Error-capture workflow using GIS and STATA

Nov.- Dec. 2021 **Coordinator, Johns Hopkins University, School of Advanced International Studies, Washington, D.C; c/o Prof. Chiedo Nwankwor**

Project Title- Report on qualitative analysis of evaluation of two programmes (SGR and WFWI) using three techniques (FGD, IDI, and KII) in three countries (Rwanda, DRC, and Nigeria) for the women's economic development project

***Tasks** perform*

- Supervised codebook creation and structured data curation
- Analyzed data for women decision making, women economic independence, women political participation, and women well-being and social welfare in the three countries using the named techniques for both SGR and WFWI
- Documentation of codes and data for the project

Oct. 2020 – Dec. 2021 **Data Science Expert, Kampala International University and NUFFIC DISH Project**

Project Title - Improving resilience, access to employment and education, facilitated by e-learning and data sharing in the Horn of Africa

The targeted trainees are hard-to-reach youth and women in and around seven (7) key regions: Tigray region (Ethiopia), Garowe and Mogadishu (Somalia), Kassala and Khartoum (Sudan) and Wau and Juba (South Sudan). The target audience also includes low-opportunity and marginalised youth, including refugees and displaced persons.

***Tasks** perform*

- Developed curricula content for Programming with Python (CS 2 1), Introduction to Data Science 1 (CS 2 2), and Introduction to Data Science 2 (CS 3 1)
- Developed the learning materials: print (readable format), videos, audio, etc.
- Developed student-focused tasks/activities, self-review questions, tutor marked assignments, and quizzes (graded and non-graded)
- Managed NUFFIC LMS as a content developer

Leadership Experience

2022 – Present **Project Manager**, IndabaX Nigeria. Overseeing and coordinating all aspects of the event annually, including team management and activity organization. https://indabaxng.github.io.

2019 – Present **Team Lead, UnilorinRUser Group**. An open community dedicated to promoting the R programming language in Ilorin, Nigeria, and supporting the R Consortium initiative. Driving efforts to advance R's use in big data analytics, federated discovery, and applications across business, healthcare, and clinical research. Facilitating continuous collaboration among R users at all levels to foster growth in data science across Nigeria.

2017 – 2018 **Member**, UN Ivy STEM Connect (A program that involved African Institute for Mathematical Sciences (AIMS) and American students from Ivy League universities to

improve participation of women in Sciences, Technology, Engineering, and Mathematics (STEM) and in the ultimately male-dominated science market.

2015 – 2016 **Financial Secretary,** Sustainable Development Goals (SDG) Advocate, Bosso Chapter, Minna, Niger state. Nigeria

2014 – 2015 **Welfare Secretary,** Association of Statistics Students of Nigeria, University of Ilorin, Ilorin, Nigeria

Conferences and Workshops Attended

Oct. 2024 Participated in the Llama 3.1 Impact Sub-Saharan Africa Hackathon in Kigali, Rwanda (October 8–10), organized by AfriLabs in partnership with Meta and the Bill & Melinda Gates Foundation. Collaborated with Testimony Adeyemi, Fareedah Okunade, Naheem Okunade, and Temitope Shokunle to develop Prometheus 1.0, a WhatsApp chatbot enabling small business owners—especially women—to build and launch websites in under 40 seconds, aiming to bridge the 37% gender digital divide.

Nov. 2023 Participated as a Trust CAN Fellow in the Festival de Datos, sponsored by the United Nations, held in Punta del Este, Uruguay, from November 7 to 9, 2023

Sep. 2023 Attended the 10th Heidelberg Laureate Forum (HLF) in Germany as a young researcher, https://www.heidelberg-laureate-forum.org/

Aug. 2023 Facilitated Reproducible Research Using Version Control (Github/Gitlab) at the 2023 Data Science Nigeria Artificial Intelligence Bootcamp. August 14-19, 2023, https://www.datasciencenigeria.org/2023-bootcamp.

Nov. 2022 Participated in the 9th Workshop on Collaborative Scientific Software Development and Management of Open-Source Scientific Packages. Location: ICTP, Trieste, Italy. November 28- December 9, 2022

Dec. 2020 Invited as a panelist to speak on the Data Stewardship Competencies Curricula Development for NUFFIC project at the International FAIR Convergence Symposium. November 27, 2020, to December 4, 2020.

Oct. 2020 Facilitated R programming end to end session at the 2020 Data Science Nigeria Artificial Intelligence Bootcamp. https://rpubs.com/gbganalyst/tidyverse-sample-exam

May 2020 Accepted as a guest speaker at the Next Einstein Forum (NEF) Global Gathering 2020, Nairobi, Kenya

Oct. 2018 CODATA-RDA-ICTP School of Research Data Science. A two-week workshop organized by CODATA on open science and data science research methods. Location: KIST 2 Building, Nyarugenge Campus, University of Rwanda, Kigali, Rwanda. October 22 - November 2, 2018.

Sept. 2018 Kigali Developer Festivals (DevFest) 2018, University of Rwanda, Gikondo Campus. September 29, 2018
Theme: Digital Wellbeing.

May 2018 UNLEASH Global Innovation Lab 2018, NUS, Singapore. www.unleash.org
May 30 - June 7, 2018

Apr. 2018 Facebook and Carnegie Mellon University African Cybersecurity Summit, Marriott Kigali, KN3 Ave, Kigali, Rwanda. April 5, 2018.

Contributions (Open-source development)

bulkreadr is an open-source R package designed to simplify the bulk import of data from multiple files and sources into a single reproducible workflow. Rather than reading spreadsheets, CSV files, Google Sheets, or labelled survey files one at a time, the package allows users to import them efficiently through a unified, beginner-friendly interface. Built to work naturally within tidyverse workflows, **bulkreadr** can read all sheets in a workbook, load entire folders of delimited files, preserve variable labels from SPSS and Stata, and generate useful outputs such as data dictionaries and missing-data summaries. Its main purpose is to reduce the time, repetition, and errors involved in manual data loading, while making research workflows faster, more transparent, and easier to reproduce. https://gbganalyst.github.io/bulkreadr **Number of Downloads**: 9412

forstringr is an open-source R package designed to simplify string manipulation tasks, especially for beginners. Built on top of the popular **stringr** package, **forstringr** provides an intuitive, consistent interface for common text processing tasks, such as pattern matching, string extraction, recoding values, and splitting strings. It is designed to integrate seamlessly with other **tidyverse** tools like **dplyr** and **tidyr**, making it ideal for users who are new to R and looking for an easy-to-use solution for handling character data. The package retains the clean syntax of **stringr**, with most functions prefixed by str_, ensuring users can quickly adapt and apply it to their workflows. By streamlining string manipulation, **forstringr** supports more efficient data cleaning, enhances reproducibility, and builds confidence in users working with text data. https://github.com/gbganalyst/forstringr **Number of Downloads:** 18k

ralger package: The goal of 'ralger' is to facilitate web scraping in R. The user can extract a vector with scrap(), a tidy dataframe with tidy_scrap(), a table with table_scrap(), and web links with weblink_scrap(). https://cran.r-project.org/web/packages/ralger/index.html **Number of Downloads**: 47k
